

### 1.1 Use Case Description

Elements	Description
The problem of...	Unable to have a class management subsystem that faculty and students can use to man and monitor their class activities
Affects...	This affects students, faculty, and the purpose of the system itself.
And results in...	Inability to resolve this issue will render the system a failure and teams cannot be created for evaluation.
Benefits of a solution	The class management subsystem will benefit:
	<ul style="list-style-type: none"><li>• Faculty because they can upload or input student names into the system</li><li>• This system will also benefit students because they could receive email alerts at the discretion of the faculty and be able to login and identify with their class and teams.</li></ul>
